If product is swallowed, may cause nausea, headache, vomiting and diarrhea and central nervous system depression.

**Signs and Symptoms of Overexposure:**

Symptoms of skin overexposure in some sensitive individuals may include redness, itching, and irritation of affected areas. Overexposure in eyes may cause redness, itching and watering.

**Health hazards:**

Acute: Vapor or mist may be irritating to eyes, mucous membranes and upper respiratory tract. Chronic: Prolonged exposure to vapors may cause nausea, headache and vomiting. Prolonged and repeated skin contact may cause sensitization.

#### 4. FIRST AID MEASURES

**Eye contact:**

Flush with copious amounts of water for at least 15 minutes. Get medical attention.

**Skin contact:**

Flush with water thoroughly followed by a washing of effected area with soap and water. If irritation, redness or swelling persists, get medical attention.

**Inhalation:**

Move to fresh air. Get immediate medical attention.

**Ingestion:**

If product is swallowed, drink plenty of water or milk immediately. Get medical attention immediately.

<b>Flammability Limits in Air % by Volume:</b>	ND
<b>LEL:</b>	ND
<b>UEL:</b>	ND
<b>Auto-Ignition Temperature:</b>	ND
<b>Extinguisher Methods</b>	Foam, carbon dioxide, dry chemical.
<b>Special Fire Fighting Procedures:</b>	When involved in a fire, this product may ignite readily and decompose to produce carbon oxide. Pressure buildup may occur due to heat exposure of closed containers. Water may be used to cool closed containers. Wear self-contained breathing apparatus.
<b>Unusual Fire and Explosion Hazards:</b>	Vapors are heavier than air and may travel along the ground to a source of ignition. Prevent build-up of explosive gases to explosive concentrations.

### 6. ACCIDENTAL RELEASE MEASURES

#### Steps to be Taken if Material is Spilled Or Released:

Eliminate all sources of ignition. For small spills (e.g., <1 gallon) Wear appropriate personal protective equipment. Flush spilled material into suitable retaining areas or containers with large quantities of water or absorb with inert material and collect in closed containers.

For spills  $\geq$  1 gallon, deny entry to all unprotected individuals. Dike and contain spill with inert material (e.g., sand or earth). Transfer liquid to containers for recovery or disposal and solid diking material to separate containers for proper disposal.

Remove contaminated clothing promptly and wash affected skin areas with soap and water. Keep spills and cleaning runoffs out of municipal.

### 7. HANDLING AND STORAGE

#### Precautions for handling:

Use local ventilation with a minimum capture velocity of 100 ft/min (30 m/min) at point of material release.

#### Precautions for storage:

Product may congeal or stratify if subjected to below freezing temperatures.

Store containers in a cool (40-80°F, 4-27°C), dry location, away from direct sunlight, heat, sparks, flame, other light sources, or sources of intense heat. Keep container closed after each use. Store away from incompatible materials (see Section 10, Stability and Reactivity).

#### work & hygiene practices:

Open containers slowly on a stable surface. Empty containers may contain residual amounts of this product; therefore, empty containers should be handled with care.

#### Special Precautions:

Avoid contact with skin, eyes, clothing, and prolonged contact with the product. Use good personal hygiene and housekeeping. After use, wash hands and exposed skin with soap and water. Do not eat, drink or smoke while handling product.

### 8. EXPOSURE CONTROLS & PERSONAL PROTECTION

#### Ventilation & Engineering Controls:

When working with large quantities of product, provide adequate ventilation (e.g., local exhaust ventilation, fans). High temperature processing equipment should be well ventilated.

#### Respiratory protection:

A respirator may be permissible under certain limited circumstances where airborne concentrations are expected to exceed exposure limits. None required if airborne concentrations are maintained below the exposure limit. Follow OSHA respirator regulations found in 29 CFR §1910.134 or other appropriate governing standard.

#### Eye Protection:

Depending on the use of this product, splash or safety glasses may be worn. If necessary, refer to OSHA 29 CFR §1910.133, Canadian standards, or the European Standard EN166.

#### Hand Protection:
